

4 Mega-Pixel Quad-HD, Rapid Deploy, Solar Powered 4G Network, Colour IP Camera

Utilising a 4 Megapixel WiFi capable IP camera, this unit is designed to offer exceptional picture quality and superior range in a remote environment. Purposely designed for remote rural sites where 240V power is not available, this unit can operate self sufficiently, drawing power directly from the sun and streaming images via 4G data network.

You can even watch from your iPhone or Android! Features include:

Power

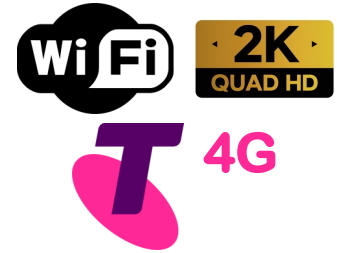

- Simple deployment, no cables to run.
- High output 100W 12V monocrystalline solar panel with pole mounting hardware and regulator. Panel measures 1100mm x 540mm x 30mm, with 1.5m lead, and Pole mounts on 30-60mm diameter pole (pole not supplied), connecting to housing via MC4/Anderson plugs.
- 12VDC 15AH SLA battery and regulator housed within sealed ABS Enclosure and pole mounting kit (pole not supplied)

Camera & 4G Router

- 4MP HDVision Dome IP Camera and pendant bracket, ONVIF compliant, IR Capable to 30m
- 128GB SD Card for Local FIFO record capability, recording in H265 compression.
- Record Duration (at Full 4MP HD): 10-14 days Motion Detect, 50-70 HRs Round-the-Clock
- IP67 rated weather proof housing.
- Pre-configured 4G LTE Sim Card WiFi Router with external 3dBi antennas, which can also be used as a Wifi Access point, allowing local users access to the internet, within a 30m range.
- Pre-Activated Sim Card (Telstra \$30 kit supplied - 3G/4G coverage required). Access camera and recordings via browser or Smart Phone using HDVISION P2P Cloud.

Mounting Hardware

- Pole mount hardware to suite 80-120mm pole (Pole not supplied) including Pole mounted solar bracket, IP67 ABS enclosure
