

## High Resolution Surveillance Camera

This high quality license plate capture camera features an intelligent 'Traffic' mode that turns speeding vehicles, headlights, backlighting and weather conditions into non-issues. While standard CCTV cameras struggle to provide clear identifiable license plate images the CCTV14PLT utilises two separate traffic modes, DSP (Digital Signal Processing) and DNR (Digital Noise Reduction) technology to continuously provide high quality clear images. It also features true Day/Night functionality to provide 24hr operation.
