

## GeoVision GV-POS Solution

Loss prevention in the retail businesses is concerned with inventory shrinkage and the shortage of currency. Losses related to POS transactions can be a main cause of the shrinkage for the most part. An effective POS-DVR surveillance solution can help employers deal with these situations.

The GeoVision POS-DVR surveillance system uses video text overlay technology to provide visual contextual awareness that helps reduce shrinkage and protect asset against business losses. While working in conjunction with GV-Data Capture, the GV-Series surveillance system can turn into a POS/DVR surveillance system, which helps you with tools to remotely monitor cashier area, associate POS transaction data with videos, record videos for retroactive analysis, and even output alarms for emergency events.

## **SPECIFICATIONS**

### **Data Capture Connector Function**

Input DB9 Female RS-232 from POS

DB25 Male / Parallel Port RS-232 from POS / Parallel Port from POS

Output DB9 Male RS-232 to Printer

DB25 Female / Parallel Port RS-232 to Printer / Parallel Port from POS

DB9 Female RS-232 to DVR

RJ-45 RJ-45 to DVR

RS-485+ Connect to GV-NET / GV-Hub / GV-Com RS-485+

RS-485- Connect to GV-NET / GV-Hub / GV-Com RS-485-

DC IN Power Adaptor DC 5V, 2A Inner Positive

Operation temperature 0~50°C

Humidity 5%~95% (non-condensing)

Dimension 161 (W) x 34 (H) x 123 (D) mm

## **SUPPORTED MODELS**

The GeoVision POS-DVR surveillance system currently supports the following cash registers and POS interfaces most popular in retail business\*.

### **Cash Registers POS Systems**

SAMSUNG 4615

CASIO TK-6000

CASIO TK-7000
