The Ness R16 Control Panel

NESS R16 CONTROL PANEL - FEATURES

The Ness R16 is a unique fully self-contained radio control panel.

The R16 has a built-in keypad for programming and user operation, a built-in piezo siren, built-in LCD display, built-in radio receiver, built-in battery backup and built-in dialler.

The R16 supports up to 16 Ness radio PIRs and up to 14 Ness Radio Keys.

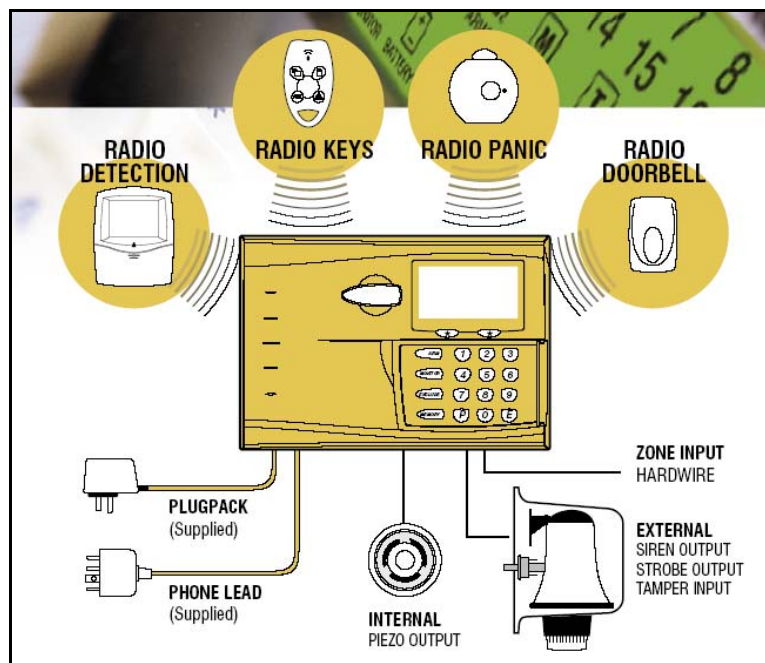

All Ness supervised and encrypted radio devices are supported. There is even a Doorbell feature with selectable tunes when used with the Ness Radio Doorbell transmitter.

In addition to the 16 radio zones, the R16 has 1 hardwired zone and 1 hardwired tamper input.

The built-in piezo siren provides high volume audible warning. The R16 also has Siren, Piezo and Strobe outputs for additional hardwired noisemakers.

The built-in dialler uses Contact ID format for central station monitoring as well as audible monitoring to any telephone. The user can also dial into the system for remote arming and disarming over the telephone line.

The R16 is designed with low power considerations in mind - for use in areas where mains power may be intermittent. In the event of mains failure, the onboard backup battery can provide a full 48hrs operation including one full alarm.

Notes, Terms and Conditions

Warranty

We provide our customers with a warranty on each product which is additional to statutory warranties imposed by law. Austral Surveillance warrants that our products will be free from defects in materials & workmanship for a period of **one (1) year** from date of invoice. Within this period simply contact Austral Surveillance & the product will be repaired without charge for parts & labour. Any product which has been improperly maintained, repaired, altered or modified in any way, neglected or misused is excluded from this warranty. Furthermore, Austral surveillance will not be liable to articles to which our products are attached or with which our products are used.

Work Authorisation

I hereby expressly permit Austral Surveillance or its agent to install an electronic alarm system on my property. This express authorisation also includes all actions incidental to installing a system of this nature: i.e drilling holes, affixing items on walls, temporarily moving roof tiles, accessing the roof top and other reasonable incidental acts. I also expressly authorise Austral Surveillance or its agent to exercise reasonable discretion regarding the installation, positioning and initialization of the alarm system.

Installation

The package price includes payment for installation of the alarm system. This however applies to "basic installations" consistent with a typical Schedule 12 Dwelling (Outlined below). Austral Surveillance or its agent reserves the right to charge a premium for installations on dwellings that are deemed non-conforming to the basic Schedule 12. Should Austral Surveillance or its agent deem a dwelling to be non-conforming to Schedule 12, notice will be given to the owner prior to the commencement of work.

Disclaimer

The installation of an electronic alarm system is by no means any guarantee against burglary. An alarm system complimented with good quality locks and security doors and grills is a more comprehensive security safeguard. Austral surveillance disclaims any liability for loss or injury suffered as a result of burglary.

Schedule 12 Dwelling

A typical Schedule 12 Dwelling is comprised of the following attributes:

Unobstructed wall cavities in the perimeter and central walls of the dwelling, a plaster based (or similar) ceiling no thicker than 1 centimetre, A frame tiled or tin roof with an easily accessible man hole, maximum floor size of 500 square metres, structure no taller than two (2) stories, non-foil insulation below roof tiles, non-foam insulation above ceiling & space within electrical conduit in rendered walls and ceilings to run wiring.

Customer Signature _____ Date ____ / ____ / ____

I hereby acknowledge the abovementioned terms and conditions.
