

There are two methods for you to play the video files in the hard disk.

1. In the desktop shortcut menu.
2. Main menu>Record->Playback

**Note: The hard disk that saves the video files must be set as read-write or read-only state.**

1. Listed files
2. File information
3. File searching
4. File backup
5. Operation hint
6. Playback control

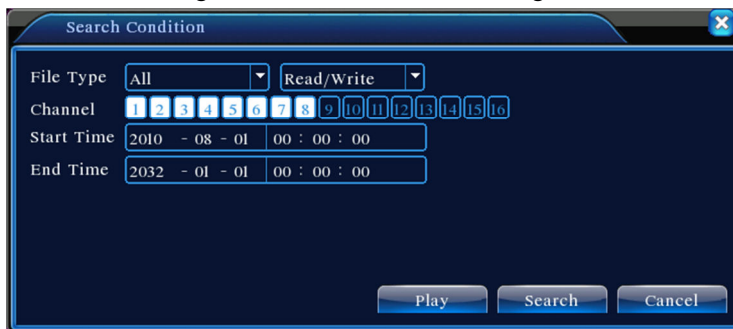

**【Listed files】** Look up the listed files that accord with the searching criteria.

**【File information】** Look up the found

file information.

**【File backup】** Backup the chosen file. (See backup sheet for more details)

**【File searching】** Search the file according to the searching parameter.

**File type:** Set the searching file type.

**Channel:** Set the searching channel/camera.

**Start Time:** Set the searching time scan.

**【Playback control】** See below for more information.

Button	Function	Button	Function
	Play/pause		Backward
	Stop		Slow play
	Fast play		Previous frame
	Next frame		Previous file
	Next file		Circulation
	Full screen		

### Special functions:

**Accurate playback:** Input time (h/m/s) in the time column and then click play  button. The system can operate accurate playback according to the searching time.

**Local zoom:** When the system is in single-window full-screen playback mode, you can drag your mouse in the screen to select a section and then left click mouse to release local zoom. Right click to exit.

**Note: Frame by frame playback is only performed in the pause playback state.**
