

There are two methods for you to play the video files in the hard disk.

1. In the desktop shortcut menu.
2. Main menu>Record->Playback

Note: The hard disk that saves the video files must be set as read-write or read-only state.

1. Listed files
2. File information
3. File searching
4. File backup
5. Operation hint
6. Playback control

【Listed files】 Look up the listed files that accord with the searching criteria.

【File information】 Look up the found

file information.

【File backup】 Backup the chosen file. (See backup sheet for more details)

【File searching】 Search the file according to the searching parameter.

File type: Set the searching file type.

Channel: Set the searching channel/camera.

Start Time: Set the searching time scan.

【Playback control】 See below for more information.

Button	Function	Button	Function
	Play/pause		Backward
	Stop		Slow play
	Fast play		Previous frame
	Next frame		Previous file
	Next file		Circulation
	Full screen		

Special functions:

Accurate playback: Input time (h/m/s) in the time column and then click play  button. The system can operate accurate playback according to the searching time.

Local zoom: When the system is in single-window full-screen playback mode, you can drag your mouse in the screen to select a section and then left click mouse to release local zoom. Right click to exit.

Note: Frame by frame playback is only performed in the pause playback state.
